What is P2P?

A peer-to-peer network is a simple network of computers. It first came into existence in the late 1970s.

Here each computer acts as a node for file sharing within the formed network. Here each node acts as a server and thus there is no central server in the network.

This allows the sharing of a huge amount of data. The tasks are equally divided amongst the nodes. Each node connected in the network shares an equal workload. For the network to stop working, all the nodes need to individually stop working. This is because each node works independently.

100% Safe Project Fund Not Deposit in Company Account

What is Crowd Funding?

Crowd funding is the use of small amounts of capital from a large number of individuals to finance a new business venture.

Crowd funding makes use of the easy accessibility of vast networks of people through social media and crowd funding websites to bring investors and entrepreneurs together, with the potential to increase entrepreneurship by expanding the pool of investors beyond the traditional circle of owners, relatives, and venture capitalists.

Smart Help 4 u Advantage

Presentations are tools that can be used as lectures, speeches, reports, and more. It is mostly presented like before an audience.
