## ABOUT US

# OUR COMPANY

**Al Jabor Trading** is an essential pillar of Al Jabor Group Holding and takes pride to claim to be one of the leading and front ranking organizations in Qatar.

Founded in the year 1958, Our Chairman **H.E. Sheikh Jabor Bin Mohammed Al-Thani** preserved a legacy of commitment, dedication, and quality of service that was passed through for over five decades and is keen to achieve continuous growth and expansion.

**Al Jabor Trading** takes pride to represent and be the sole agent of some of the world's renowned brands which covers every aspect of commercial and business activities of its field in Qatar.

At the root of the spectacular development that **Al Jabor Trading** has witnessed and earned ever-growing customers' trust over the years, the organization is engaged a quality product and services that provided by our highly professional employees who are trained to operate effectively under most rigorous and competitive environment.

## DIVISION SANITARY WARES

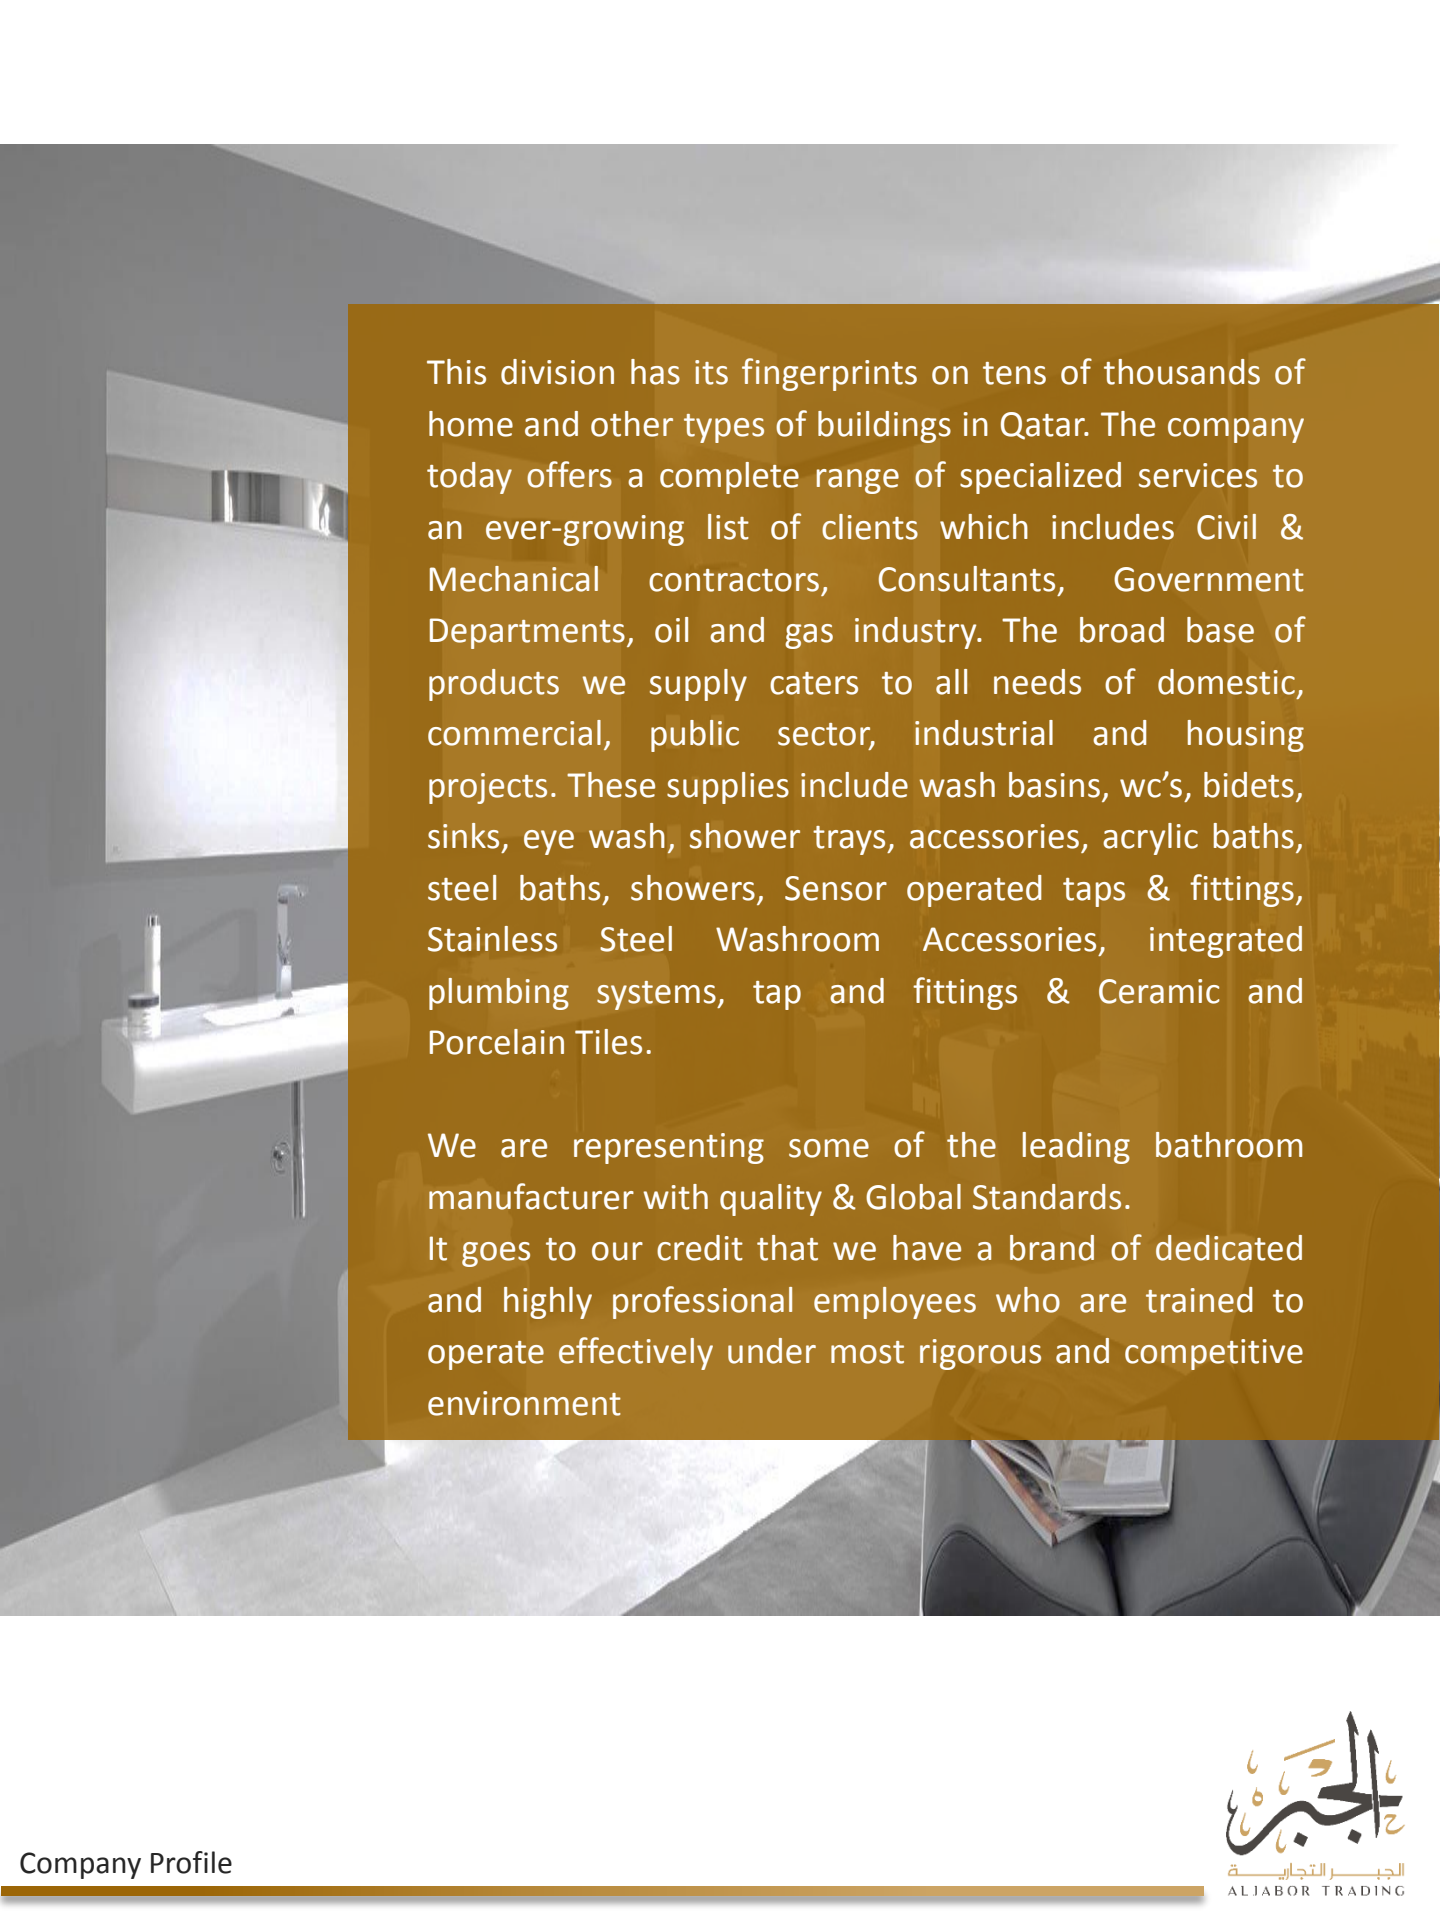

- Fitting & Bathroom Accessories
- Ceramic & Porcelain Tiles

World Class  
&  
Trusted  
International  
Brands

This division has its fingerprints on tens of thousands of home and other types of buildings in Qatar. The company today offers a complete range of specialized services to an ever-growing list of clients which includes Civil & Mechanical contractors, Consultants, Government Departments, oil and gas industry. The broad base of products we supply caters to all needs of domestic, commercial, public sector, industrial and housing projects. These supplies include wash basins, wc's, bidets, sinks, eye wash, shower trays, accessories, acrylic baths, steel baths, showers, Sensor operated taps & fittings, Stainless Steel Washroom Accessories, integrated plumbing systems, tap and fittings & Ceramic and Porcelain Tiles.

We are representing some of the leading bathroom manufacturer with quality & Global Standards. It goes to our credit that we have a brand of dedicated and highly professional employees who are trained to operate effectively under most rigorous and competitive environment

# Armitage Shanks

It is our privilege, nay our prerogative to be the sole agent of Armitage Shanks, U.K. (Sanitary wares & Fittings) since 1961. Armitage Shanks

Sanitary wares are one of the most reputed manufacturers in the world and the products meet with the highest British and Global standards. Armitage Shanks is renowned for its well-designed, reliable sanitary-ware.

We also represent some of the leading bathroom manufacturers with quality & Global standards.

It goes to our credit that we have a brand of dedicated and highly professional employees who are trained to operate effectively under most rigorous and competitive environment.

## SCHOOLS

A school's washrooms play a vital role in establishing a positive educational environment. Safe, clean and functioning toilets remind pupils that their school is concerned about their welfare. They help to promote improved behavior and academic performance.

Armitage Shanks has been a key supplier to schools since 1910. We have used our experience to develop many specialized products that meet the unique demands of educational use. From low-height WCs to water saving anti-vandal mixers, our products are at the heart of the 21st century school toilet.

## PUBLIC BUILDING

By definition a public building is open to a broad cross-section of society, each member of which has their own unique needs. An effective public building, be it a library, train station, airport or law court, must accommodate the wide ranging demands of the people it serves.

Armitage Shanks, the market leader in commercial sanitary ware and fittings, caters for almost every conceivable washroom need that may arise in a public building. From Part M solutions for less able users to anti-vandal products and electronic water management systems, we have a solution.

## HOSPITALS

Choosing sanitary ware and fittings for hospital use can literally be a life or death decision. The need to deliver water and remove waste efficiently, reduce cross infection and cater for the physical limitations of patients demands a lot from every sanitary installation.

Armitage Shanks has a long history of working with the Department of Health to determine the functional requirements of hospital sanitary ware. We continue to design and refine products specifically for hospital use in line with the requirements of HTM64 a healthcare standard.

# creavit®

the bathroom

In the way that The Çanakcılar Corporate Group which is one of the most respected companies of our country to nature and natural things start with producing squatting pans in a small workshop in 1960's, Creavit is continuing its path as an innovative brand that showing up in 5 continents and 60 countries and designing aesthetic, healthy, quality and nature-friendly products for you with 50 year-experience and workers more than 600 of the industry with many firsts.

Çanakcılar Corporate Group is one of the most environmentally friendly company of Turkey, with the power of its long-standing background which has started first with producing sanitary wares, constantly increases its contribution to product solutions of wet areas and offices. Çanakcılar Corporate Group is the power behind Ceravit, Doxa and Armica.

Creavit will carry on business at full capacity in 2017 by increasing its total production and marketing capacity to 4 million pieces a year in 2016 as a result of the investments of 25 million USD made in 2015. Product range and manufacturing competence for different products will be extended besides production capacity by means of the technological investments made and investment expertise supported.

The Çanakçılar Group of Companies and Creavit's indispensable quality concept in production. It has been proven with its quality documents and its 12 year warranty products offered to consumers in Ceramic sanitary ware that it does not give up this understanding. There are qualifications that qualify for quality, humanity and environment.

Creavit Life Park is the reflection of Creavit's social values which is demonstrating the respect and harmony of living together aspect. As an unique example, Creavit Life Park includes a Zoo, Botanical areas and an Archeological and Ethnographical Museum in 30 decares of open business area. Creavit carefully keeps and cares 1000 animals from 80 different species and hundreds of flowers and plants together with 1311 historical artifacts. Life Park offers the opportunity to observe the importance of preserving natural heritages as well as is making visitors witnessed to its beauty. Life park is open to all nature lovers.

## EXPORT

Creavit is exporting 40% of its production capacity and distributing its products to 5 continents through its strong partners in Europe, Asia, Africa, America and Australia. The brand is providing support its partners in a wide range of training and exposure to fair attendances and communication. Creavit has been adopted to Tur quality is the branding program of Turkish Government in 2015 . Thus Creavit is increasing its sources as well as gaining and growing with its business partners.

## DESIGN

Realizing that the production alone is not sufficient at the road to success, Creavit believes in the power of sensational genuine designs which appeal to different feelings and create solutions for every problem. Creavit achieves award winning designs through working with successful national and foreign designers. Also gives opportunity to young talents to demonstrate themselves. Therefore transfers the ideas of both professionals and young talents into exclusive designs and transforms such quality and practical designs into elegant bathrooms.

**Zurn** is the only manufacturer that provides a complete single-source toilet, flush valve and carrier system. We deliver an easier-to-install product package for the contractor, easier specification for the engineer, simpler purchasing for the distributor and a better-performing restroom for the customer

By consolidating all components under a single-source provider, Zurn is able to control design and durability for easy installation, while providing the lowest lifetime maintenance cost. Whether it's new construction or a retrofit application, we have everything you need to bring your plan to life

**Zurn** understands what is at stake in a medical setting. Patient health and provider safety are under constant threat. The *inherent* exposure within these facilities is intensified without proper hygiene and bacteria management.

**Zurn's** systems and solutions reduce risk throughout the healthcare facility. We acknowledge and address the unique demands of medical water applications with proven products that span the installation process—from rough-in products, behind-the-wall components, finish trim and fixture systems

Laying its foundation with Canakkale Ceramic Factories Corporation in 1957, Kale Group pioneered the formation of the ceramics industry in Turkey, and has become an industry giant in the world with its investments. It has grown over the course of time with investments in machinery and equipment manufacturing, defense, chemistry, electrical appliances, energy, IT, transportation, tourism and foo...

Kaleseramik's Vitreous China ceramic sanitarywares are manufactured under the warranty of the ISO 9001:2000 Quality Management System. The company also has OHSAS 18001 Occupational Health and Safety and ISO 14001 Environmental Management systems in place.

This declaration is relevant to vitreous china ceramic sanitaryware produced at a single location at Çan/Semedeli plant in Çanakkale in Turkey. This EPD declaration applies to all vitreous china ceramic sanitaryware production by Kaleseramik. This is an average EPD which represents the life cycle analysis of the vitreous china product group.

## BUILDING VALUE SINCE 1906

**Bobrick** is a 100+ year-old global washroom accessory and partition company headquartered in North Hollywood, CA with six manufacturing divisions across the United States and Canada and business operations that extend into 85 markets worldwide.

### Portfolio of Values

What makes Bobrick, well, Bobrick?

A 110-year legacy of commitment to the issues that matter most to architects, building owners, facility managers and distributors.

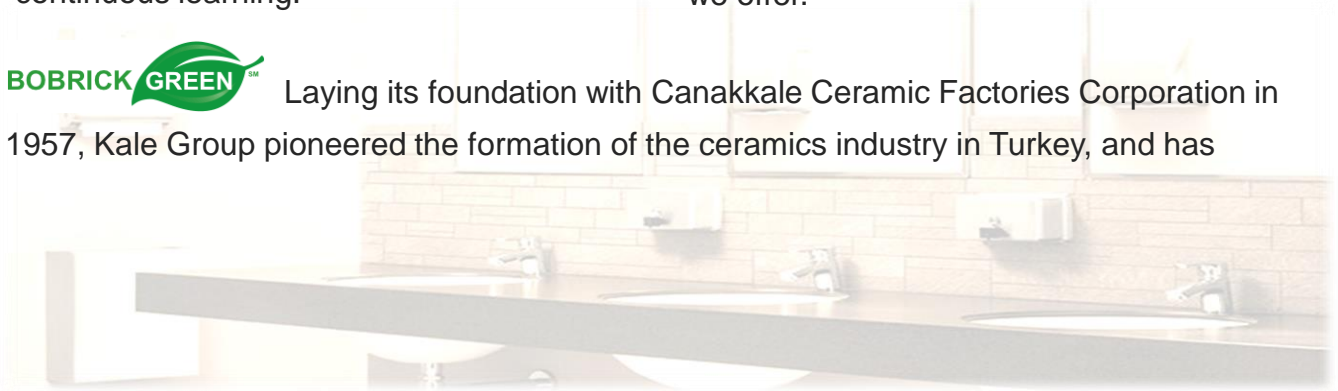

A leader in product innovation and manufacturing, Bobrick prides itself as a company that delivers best-in-class products and service, while fostering an environment of collaboration and continuous learning.

Our Portfolio of Values is the foundation of everything we do, inspiring us in our product development, how we do customer service, and allowing you to easily identify the value built into every washroom solution we offer.

Laying its foundation with Canakkale Ceramic Factories Corporation in 1957, Kale Group pioneered the formation of the ceramics industry in Turkey, and has

Founded in 1960 Nofer designs and manufacturers more than 1.000 stainless steel bathroom products for private and public bathroom. All items are Made in Spain.

Manufacturing facility is in Barcelona Spain Distributed in more than 40 countries worldwide. Head office for MENA region in Beirut, Lebanon Our product range offers products for a wide range of applications (Hotels, Prisons, Hospitals, Malls, Sport Stadiums etc. etc.)

With our own R&D department we continuously develop our assortment according to latest technology and design trends In 2018 we move to a new facility, 6000sqm big with a state of the art Trainings Centre of 400sqm

NOFER was set up in Barcelona, Spain, 50 years ago and now offers its products and expertise in over 50 countries around the world. The manufacturing facilities are in Barcelona, Spain, where over 1000 sanitary and stainless steel products are produced.

Innovation in product design and manufacturing has meant that NOFER now offers a wide range of products. The attention to detail and a focus on quality control to supply products that meet the customers' needs means that NOFER is now one of the leading suppliers for these types of products in the industry.

## Quality

Nofer employs the ISO 9000 standard as the basis for its quality management system. This means that there is a strong customer focus and working processes that ensure continuous control and self-improvement. In turn, this ensures that customers receive high quality products and service at the end of the process. NOFER works with the best national and European laboratories to constantly improve the technical, safety and ergonomic aspects of the products.

## Nofer and the environment

Nofer as a company is actively engaged in environmental care and works towards ensuring that its business activities have the minimal possible impact on the environment as possible. From the design and material selection to the business management, all the activities are managed and run with this in mind. NOFER is conscious about the eco value that the products can provide to a building and has the LEED certification, issued by the GBCe (Green Building Council España) and by the (U.S. Green Building Council). This certificate recognizes the benefits of equipment that has been designed to help the environment by using less energy.

## Quality and Design

The design of NOFER products is underpinned by the ISO9000 standard. The process of product design, quality control and testing is carried out with the end user in mind. To produce and supply a reliable and efficient product, NOFER pays careful attention to the technical, safety and ergonomic aspects of the design and works closely with the top national and European laboratories

## A Universal Product

Our aim is to create products that can be used by all types of users. With this in mind we work on the principal that our products should be suitable for everyone. It is because of this that NOFER is able to offer a complete range of bathroom products which are adapted to the needs of all our customers.

It all began in the year 1922. Then, the first fixtures factory was founded in Poland. After the war, despite a new not always favourable reality, we stayed on our chosen course to develop technologies and products, setting ambitious goals.

The year 1970 is one of the milestones in the history of the company – we expanded our factory with a new branch in Jordanów. Due to this investment and the high quality of production, we fared quite well in the new conditions of the market economy, which two decades later took effect in the country on the Vistula.

Our products, mainly bathroom mixer taps, have always been very popular on the domestic market. The company has also been a leader in launching new products - we were the first to introduce innovative ball valves of our own design onto the Polish market.

Since the acquisition of an investor (1994), we now operate as Valvex S.A. We have begun cooperation with the US Meridian International Group based in Milwaukee, Wisconsin, which employs over a thousand employees in manufacturing plants in the United States and Europe.

We are one of the leading manufacturers of bathroom and kitchen mixer taps, and also water, gas and central heating system fixtures. Products with the Valvex

logo are well-known and respected both in Europe and America. On each market on which we are present, Valvex is always synonymous with quality, reliability, and original design.

Carefully listening to the needs of our customers, we continually invest in our technological and design facilities. As a result, Valvex can boast about the prestigious ISO 9001 certificate and the "environmental" ISO 14001, confirming that we manufacture with respect for the environment.

By the term "environment protection" we understand water and soil protection, air protection and waste management.

Our company, in addition to conforming to formal and legal regulations in this field (i.e. having the appropriate permissions), continues to invest in environmentally friendly solutions. We do this in four ways.

We make every effort to ensure that the technology used in our factory does not harm the environment. For this purpose, we have implemented an Environmental Management System, and our methods are consistent with the international ISO 14001 standard (we obtained the certificate confirming the compliance of procedures with the standard in November 2009).

Sophisticated system of production organization minimizes the consumption of raw materials and utilities, and quality control makes sure that the manufactured products are not defective. As a result, we consume less power and introduce less waste into the environment.

Moreover Valvex has numerous product certificates and technical approvals issued by Polish and foreign certification bodies.

National Institute of Hygiene - PZH, Building Research Institute - ITB, Oil and Gas Institute - INIG, Laboratories CARSO-ACS - France, TSU - Slovakia, DBI-DVGW lab - Germany, URBAN INCERC - Romania are institutions where our products were tested. We have approvals for sale in the European Union, Belarus, Russia and Ukraine

# PRESTO

When André Patient founded **PRESTO** in 1927, soon to be joined by his brother Lucien, the two men had only one idea, to offer solutions that make it possible to save water in public spaces. Their first invention, a true stroke of genius, was the timed tap, followed later by hundreds more tapware solutions, most of which were patented.

From invention to invention, **PRESTO** became the leader in the design and manufacture of tapware and accessories for sanitary appliances in community facilities, healthcare establishments and laboratories.

Continuing this urge to innovate, we strive to offer products that encourage water consumption control, disabled access and compliance with health and safety standards.

The **PRESTO** group has 220 employees in France working at its headquarters in Montrouge, near Paris and on two production sites in the Poitou-Charentes region. The Saint-Georges-de-Didonne site designs and manufactures all the **PRESTO®** product lines, whereas the Angoulême site exclusively manufactures SANIFIRST® solutions.

Present in over 80 countries, in Europe, North America, Oceania, Asia, the Middle East and North Africa, the **PRESTO** Group has strengthened its international influence by creating four subsidiaries: PRESTO Italia, PRESTO Armaturen (Germany), PRESTO Middle East (Dubai), PRESTO North Africa – since 2015.

On March 1st of 1954, **OLI-Sistemas Sanitários**, S.A. was founded in Aveiro as a small family business that along its path went through different areas of business. In the 1980s OLI set up its first cistern production unit. During the following ten years OLI grew exponentially, which led into the integration with the Italian Fondital Group in 1993. The group has about 2,600 employees and is present in four sectors of activity (heating; aluminium fusion; galvanoplastic and thermoplastic products; water conveyance and discharge), and in 2015 had over 674 million Euros in sales.

**OLI** currently has a daily production of approximately 7800 cisterns and 31 800 mechanisms. This makes OLI one of the major producers in Europe for mechanisms for the ceramic industry, as well as concealed and exposed cisterns. Currently, OLI is the only Portuguese company producing concealed cisterns.

The fact that **OLI** is in more than 70 countries worldwide and with 80% of production directed towards the export market, is the perfect example of

the global coverage the brand has achieved. Based on a well-structured research, development and innovation policy our products are recognized and certified by the highest world standards, which motivates us to continue to invest in a personalized differentiation strategy. Since each market is distinct, different OLI products may be available in different markets. Being able to adapt our wide range of products to the unique characteristics of each country is clearly a competitive advantage that distinguishes us from others.

### **Manufactured by ASIL KROM EVYE SAN. VE TIC A.Ş.**

Asil Krom began production of their stainless steel sinks in 2006. From our 20,000 sq.m. production facility, we have taken our place among the leaders in the industry. There are currently millions of Asil Sinks in 64 countries around the world and it continues to grow daily. We take pride in supplying the most elegant and functional products to our customers by extending and developing our product range on a continuous basis, some of which comes from the feedback we receive from the clients themselves. Our expertly trained employees, guarantee and support all our products by following and applying our strict quality control policies.

**WELCOME to the ASIL Family of fine products!**

### **Floor drain solutions**

#### **OMP TEA: quality products since 1957**

OMP TEA, one of the world leading manufacturer of sanitary waste fittings, has been established in Lumezzane, in the province of Brescia, since early 50s.

The company specializes in the production of brass and plastic traps and wastes for the removal of used water in the bathroom and the kitchen. Focusing on design, quality and functionality we have been able to complete our range with high standard products such as gullies and floor drains for showers and wellness area of Hotels, Resorts, Spa and Beauty Farms.

Thanks to continuous investments, the company carries out its production with the latest machinery, injection presses for plastic, automatic machines for cutting and bending brass pipes, robotized workstation for polishing of metal products, automated lines for assembly and packaging of products. The entire production process is made in Italy, employing specialized staff.

We built up a large warehouse where all our products are stored, ready for dispatch. Through a system of bar codes and radio frequency devices, we can ensure timely shipping, allowing our customers to operate at lower storage costs.

To better serve our customers we activated a network of warehouses in various European countries in order to distribute our products ready for delivery.

A forty-year experience in exports has enabled us to improve the quality of our products and obtain important quality certifications.

Sirkeci Kardeşler Plastik Aluminum Joinery Industry Limited Company which started its commercial life in Istanbul Fatih with aluminum profile joinery in 1986, has been producing steam cabin with Sırduş brand in 1996 for the locomotive companies in the sector for 25 years and with Sır Akrilik brand in 2003 for the production of bathtub, Shower and Bathtub Cabinets.

Our company, which seeks new markets with its existing production structure and capacity, continues to evaluate export proposals and develops its domestic and foreign dealer network thanks to the diligent work of our existing dealers and the trust and interest of our customers. Our firm, which works with a dealership system, does not compromise in quality, and is produced entirely with our national facilities.

We have been awarded with TSE Certificate and Production Certificates and quality in international and national platform. Our company, which offers extensive service network with end-user parts and production guarantee, continues to give confidence.

With origins going back over 100 years, Prospec Ltd was established in 1985, where the company's initial strategy was developing a worldwide glass wall market for the squash industry. In the late 80's Prospec expanded into cubicles and lockers, and the Marathon brand was founded. With proven brand quality and over 35 years' experience in the leisure industry Prospec is considered to be the market leader in the locker and cubicle sector.

Specialists in lockers & cubicles, providing high quality changing, WC and shower cubicles, storage lockers and complementary products in glass and compact grade laminate.

We use our specialist glass knowledge to develop innovative glass systems to our expertise in durable compact grade laminate. All of our Marathon & glass cubicles are engineered for high traffic use in both for wet and dry areas, for the commercial and leisure markets.

All cubicles are available in compact grade laminate and glass to complement with our locker ranges and ancillary products. Available with design features compliant with the latest DDA and building regulations, we can provide layouts and individual cubicles to meet specific job requirements.

The Prospec range of lockers are engineered for demanding environments from public swimming pools, where resistance to vandalism, ease of maintenance and cleaning are vital, to the provision of high quality glass lockers to the health and fitness and commercial market, where design is paramount.

All Marathon lockers are available in compact grade laminate and glass to complement our cubicle ranges and associated products. Available with unique design features compliant with the requirements of the latest DDA and building regulations.

Trojan vanity units, Trojan duct panels and Marathon bench seats are available in a range of styles and materials to provide the finishing touches to your project. Available with design features compliant with the requirements of the latest DDA and building regulations.

Prism Cement Limited is one of India's leading integrated building materials companies; with a wide range of products from cement, ready-mixed concrete, tiles and bathroom products to modular kitchens. The company has three Divisions, viz. Prism Cement, H & R Johnson (India), and RMC Readymix (India). For the year ended March 31, 2016, the company's consolidated gross sales turnover was Rs. 6044.8 crores.

Established in 1958, H & R Johnson (India), a division of Prism Cement Ltd is the pioneer of ceramic tiles in India.

Over the past five decades, H& R Johnson has added various product categories to offer complete solutions to its customers. Today, H&R Johnson enjoys the reputation of being the only entity in India to offer end-to-end lifestyle solutions covering Tiles, Sanitaryware & Bath Fittings, Engineered Marble and Quartz as well as Modular Kitchens & Modular Furniture.

### **Manufacturing Capabilities**

Our manufacturing capabilities are strategically flanked across different locations in India giving us greater leverage to respond to market requirements within the shortest time. Industrial Products & Natural Resources division of H & R Johnson has scientists & researchers working continuously to develop technologically advanced innovative products that help us maintain our technological edge

### Green Initiative

As a socially responsible company, Johnson has initiated a number of measures to reduce energy consumption and to conserve and preserve precious natural resources. Our manufacturing operations are increasingly using greener fuels like biomass and wind energy. We leverage local resources and manufacture and distribute locally in order to cut down on fuel consumption wasted in transportation. We also use minimum water, mostly harvested rainwater, reuse energy diligently and recycle waste. We have also installed high grade pollution abatement devices that restrict the release of noxious gases such as SO<sub>x</sub>, NO<sub>x</sub> and SPM into the environment.

The company has registered two projects under the Clean Development Mechanism which is generating certified emission reduction (CER). Additionally, we have two projects on the VER+ scheme accruing VER+ credits. These initiatives have been recognized by external and Government agencies such as Gas Authority of India Limited (GAIL) and the Bureau of Energy Efficiency (BEE), Ministry of Power, Government of India. The bigger reward, however, is the fact that we are leaving the planet behind for our children, like the way we found it. Pure and green.

Customers choosing to use our products can avail LEED or equivalent credits toward Green Building Certification under the following categories –

As painter delivered its imagination on canvas, LEO CERAMIC done work of painter and provide range of product which matches with people's expectation and company help customer to decorate their place as per their imagination.

Since the initiation of our first unit in the year 1980, we realized that "Success demand Creativity & Innovativeness." In a span of 35 years, Leo ceramic has managed to innovate with the changing needs of the ceramic industry.

We are pleased to introduce ourselves as a leading manufacturer and exporter of ceramic digital tile Brand. Started by the dynamic players of ceramic industry; the company offers a wide range of state-of-the-art ceramic digital wall.

Initiated to cater to the quality conscious society; Leo ceramic has the product range that suits the needs of modern architecture industry and delivers a fine balance of style, color, texture and function.

# NIRO GRANITE'

Niro Ceramic Group has been around for more than 30 years. Marketed under the brand name of Niro Granite, its first manufacturing plant was established in 1979 in Switzerland to announce the presence of porcelain tiles to the world. Ever since, varieties of tiles were exported across the globe and the rapid growth in the Asia markets eventually led to the success of Niro Ceramic Malaysia's establishment in 1988 and Niro Ceramic Indonesia in 1995.

The continuous investment and adaptation to meet customers' demands have caused yet another rapid expansion of Niro Ceramic Group's network to Vietnam which led to the establishment of Niro Ceramic Vietnam in 2010. In that same year, Niro Ceramic Group also started its Distribution Center and Showroom in Spain. In 2013, one of the notable tile brands in Spain became part of the group, Zirconio was acquired by Niro Ceramic Group. In 2014, Niro Ceramic India is established. Having a diverse network across the globe enabled Niro Ceramic Group to be the leading supplier that is backed with large stock keeping, ensuring prompt delivery with great credibility and customer satisfaction guaranteed.

For over 3 decades, Niro Ceramic has succeeded in preserving the Swiss Heritage of always delivering high quality products and services to the customers despite having many new product lines and numerous geographical expansions.

Moving forward, our people are enthusiastic with great possibilities ahead. As clearly stated in our corporate mission statement, we strive to bring the best trendy collection of high quality porcelain tiles, efficient customer services and most important of all, the value added strategies to our partnerships all around the world.

## Renovations without rubble

Due to the minimum thickness of the ceramic plates, it is also possible to lay them on the existing floor and wall tiles. Rubble is therefore avoided during the works and time and money are saved.

A new ceramic product developed by Roca. A high range porcelain tile, with a large format and the maximum lightness and endurance. It comes to life with the clear intention of being the perfect ally for professionals in the architecture and interior design fields. It adapts to all kinds of surfaces: floors, walls, furniture, etc. The result achieves a uniform aesthetic ensemble that conveys personality to projects.

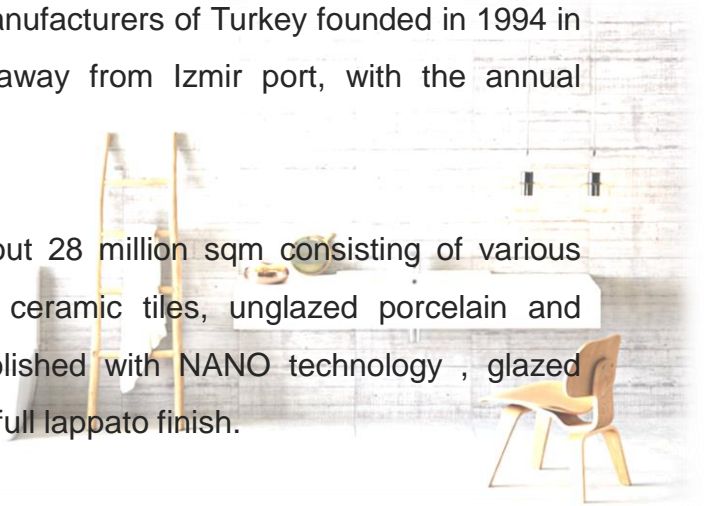

Architecture is the art of balance and formats need to respond to any use. The technical and aesthetic features of thinbig® respect and fulfil this objective. thinbig® keeps its subtle nature in large format pieces. Its delicateness is always present despite working with large-sized pieces. Being able to play with details is always a luxury. The durability of materials is essential in urban projects and large scale projects. thinbig® has been created to maximise its use without diminishing its look with the passage of time.

Seramiksan is one of the leading tile manufacturers of Turkey founded in 1994 in Turgutlu / Manisa, where is 45 km away from Izmir port, with the annual production capacity of 1,5 million sqm.

At present, our annual capacity is about 28 million sqm consisting of various sizes and designs of wall and floor ceramic tiles, unglazed porcelain and "soluble-salt" tiles which are being polished with NANO technology , glazed porcelain tiles with natural, lappato and full lappato finish.

We are following the latest technological developments our sector and running our production facilities with the recent innovations in ceramic industry. In our range, we have the wall and floor tile series which we called them "Digiart" and produced with roto-digit (ink-jet) printing technology.

Our main goal is to continue our growth in domestic market and in export markets by increasing our capacity with the production of new types of tiles which will be added to our range with our new investments.

# Canaletas

Since it was founded in 1965, **Canaletas** has been one of the leading European manufacturers of water coolers, and among the top sellers in Spain. Manufactured 100% in Spain, with headquarters in Barcelona, an area with an important industrial fabric and logistics network.

## **R&D** - Specialised in water coolers

Canaletas has an active R&D department specialised in water coolers, which allows the company to launch new products and processes on the market. Canaletas was the first company in the sector to pass the sanitation tests established by the EBWA (European Bottled Watercooler Association) and the only company to pass them all.

## **Over 50 years manufacturing water coolers and drinking water fountains**

Factory specialised in water coolers and drinking fountains, offers a broad range of models able to satisfy the needs and habits of different clients in a wide variety of countries. Flexible production in conjunction with the R&D department and a deep market knowledge allows the company to design models that fulfil specific requirements.

The **Amorim** Group is one of the largest, most entrepreneurial and dynamic multinationals of Portuguese origin. Its origins were in the cork business, back in 1870 and today it is the world leader in the sector.

Guided by a vision of sustained growth, the Group has engaged in the diversification of its business in sectors and geographical areas with high growth potential. In the 1960s, the process to vertically integrate the cork business and internationalise activities began.

### **WHY WICANDERS**

Cork is much more than a sustainable raw material. It also provides amazing comfort features. Its honeycomb structure contains millions of air-filled cells that explain its unique properties.

### **COMFORT**

#### **Silent**

Cork is an extremely efficient natural sound absorber because its cells work as an acoustic insulator. Comparing the walking sound between cork and laminate floors, tests confirm that cork floors have an exceptional result reducing the walking sound up to 53%.

#### **Natural Thermal Insulation**

The natural thermal insulation properties of cork make Wicanders' floors very energy efficient providing a pleasant touch, even barefoot, and an optimal temperature all year round which contributes to an overall sense of comfort.

## HEALTH

### Walking Comfort

As it softens impacts and provides tactile comfort, cork is particularly suited to the balance and wellness of the human body. The natural flexibility of the material results in comfort of movement and coziness, easing the impacts in our body while reducing tensions.

### Indoor Air Quality

Wicanders floors comply with the strictest indoor air quality standards after being tested on over 2000 potential chemicals.

## PERFORMANCE

### Impact Resistance

Cork's elasticity and compressibility allows it to adapt to pressure. When compressed, it doesn't lose flexibility, recovering its initial shape and volume without suffering damages.

### Design to Perform

Wicanders' products are designed to resist under the toughest conditions, always with incredible stability and exceptional performance.

## SUSTAINABILITY

Inspired by Nature, Wicanders represents a unique balance between the creation of innovative products and the protection of the environment.

# cisal

**Cisal** is the outstanding example of an independent and fully integrated Italian manufacturer, performing the complete production cycle, characterised by innovative technology and management solutions.

Founded in 1952 by Liborio Soldi and named **CISAL**, the company has gone through all the epic seasons of taps where Cusio has been the protagonist since the beginning.

**Cisal** is now one of the leading innovators in the industry and is very conscience about the efficient use of resources, water and energy, and focuses on the continuous development of innovative products with regard to design, materials, function and performance. Thanks to collaboration with international designers such as Karim Rashid, Giampiero Peia, Raffaella Vecchi, Nevio Tellatin and Marco Poletti, the Collections masterfully combine aesthetics, functionality and reliability.

## A STORY OF PEOPLE

At the root of Etò's history is Severino Marrancone who has been one of the reference professionals in the world of ceramic modeling for 50 years.

In many years of work he has been able to create around himself an entourage of artisans who share with him the passion and culture of their work.

In 2003 he gathered a team made up of expert workers to which he flanked young boys willing to learn the art: thus a ceramic modeling workshop was born which in a short time became the technical partner of the most successful world companies in the sector.

Today, with a vision shared by his three children, he launches the Eto 'forme ceramiche brand: the synthesis of his professional career, to challenge the limits of ceramic material and create avant-garde collections.

## THE ETÒ PROJECT

**Etò Ceramiche** is the new design project by **Matrix Modellerie**, a leading company in sanitary modeling. The history of Matrix is a history of excellent craftsmanship, in which the projects of international companies producing high quality sanitary ware have been modeled for fifty years. A traditional knowledge that today finds a new contemporary form in the **Etò** brand. The goal is to harmoniously combine craftsmanship and contemporaneity, form and material.

The gesture and the beauty.

Fifty years of know-how in technology and manufacturing, focused on the most complex and sophisticated brassware product, the thermostatic mixer. These are the essential interpretative keys to HUBER, one of the leading manufacturers in Europe and by far the Italian leader in this industry.

From the beginning back in the mid Sixties with the Thetamix milestone, through the innovations made since 1987 the case history quickly unfolds with the design and manufacture of the first modern bathroom thermostatics with design and features suited to contemporary needs. Quickly becoming an important industrial business, HUBER has always believed in the total control of the product and its manufacturing process, which is fully integrated into its facilities.

A strong and skilled team of engineers, researchers and designers is dedicated to the continuous development of technology and design.

## Tonino Lamborghini

A new collection has been recently added to the Tonino Lamborghini Home line: the new faucets collection inspired by the modern and innovative style of the Bull brand.

Manufactured in collaboration with Paini Spa, leading company in the Italian taps sector, the new faucets have been designed as small sculptures, original interior décor elements of strong character, unique in shape, with a pure and essential design and reach details.

Original objects adaptable to any context and place, all the new models have names inspired by the most famous circuits of Formula 1.

Created in collaboration with the Tonino Lamborghini Design Center, the faucets are manufactured by Paini in Pogno (Novara), in its 84,000 square meter plant on the shores of Lake Orta, Italy, in compliance with the strict international standards that require the use of higher quality raw materials, control over the production process and analysis of the operation of each individual product.

# COSMIC POMD'OR

Pomd'or started in Barcelona in 1974 as a manufacturer of glass objects for opticians. Later on, evolving into the manufacture of glass for decoration; vases, glass beads, doorknobs...

In the mid '80s pomd'or decided to fuse metal and glass, creating the first accessories collection and in time specializing in bathroom accessories.

With the launch of the Kubic collection in the mid '90s pomd'or experienced great growth both domestically and abroad.

In 2009 Industrias Cosmic S.A. took over the manufacture and marketing of pomd'or in order to position it as a leading luxury and elegance brand. This operation is the result of the ROCA-COSMIC alliance to combine synergies and become world leaders in the business of wall mounted accessories, free standing accessories and furniture.

Currently, there are some 1,400 stores worldwide.

# Sanitana

**SANITANA** is a company located in Anadia, Portugal. It produces and commercializes sanitary ware and bath related products. It was founded in 1979, having been the first Portuguese ceramics company dedicated exclusively to the fabrication of sanitary ware.

Nowadays **SANITANA** commercializes the following products: sanitary ware series, wash basins, bath furniture, urinals, taps, simple and hydro massage bathtubs, hydro massage columns and cabins, shower enclosures, shower trays and kitchen sinks.
